The favored young lady to whom the honor has been awarded is Miss Hazel Adele Tonks, the charming seventeen-year-old daughter of Harry Tonks, a prominent manufacturer of Newark, N. J.

## AT LAKE HOPATCONG, N. J.

LAKE HOPATCONG, N. J., July 25.—The present week has been a notable one, because it marked the beginning of two series of entertainments without which Hopatcong's season would be a failure—the dinner given by Mrs. Howard Willets and Mrs. George Thompson of New York, and receptions by Miss L. Harper, Miss K. Pierson and Mrs. B. Garrison of Brooklyn, at which were present prominent social leaders. There were so many functions scheduled for the week that the members of the social set were sorely perplexed how to attend them all. The liveliest place at Hopatcong in the evening is Nolan Point, which is crowded to its utmost capacity with cottagers and hotel guests, who indulge in dancing and other amusements. A coaching party given by Mr. and Mrs. Walter Wallace of New York to their friends of the Arion Club on Wednesday to Budd's

ATLANTIC CITY, July 25.—The Jersey girl is the beach front's newest acquisition. Her bathing garb includes a wide brimmed cap, patterned after the Jockey model and made of velvet in two colors, a basque effect to the waistline, a tight fitting skirt and hose of the same two colors seen in the cap. On the boardwalk the caps have grime and different forms, are close fitting and are of single colors. Wide striped blazer coats go along with the rest of the toilet.

Water polo in the ocean is a diversion that has recruited a tremendous following this week. When the combats have calmed into long, lazy swells the young men and women get out into deep water and using two long anchored posts fixed apart as goals play contests that have proved to be great sport both for the players and onlookers. An extra heavy wave frequently strikes players as they struggle and sweeps them high and dry up on the beach.

Some of the most daring athletes have introduced the trailing board, a cedar plank eight feet long and eighteen inches wide and is towed by a motor boat. The riders either balance themselves with standing erect or stretch themselves out at full length as the speed of the power craft whisks them across the breakers. The sudden jerks and bounding of the breakers gives a rough riding effect that is exhilarating.
